

"Let's code , little scientists"

## Description is the same for everyone

*This game joins the actions of the E-twinning Program titled "little scientists "*

The aim of the game is for the students to find all the hidden materials to do a physics experiment. The students follow a certain route, either with robotics kits or with unplugged activities. They should go through the boxes with the question cards, read and solve the riddle that reveals to them the part of the class where the hidden material of the experiment are.

When they have found all the materials ...they are ready for action!!!

Little scientists, are you ready??
